WORK EXPERIENCE

Senior Software Engineer
Oracle

06/2024 - Present *Hyderabad*

Role and Responsibilities

- Working on design, development, testing, and support activities for features delivered across WAF4SaaS Controller and related cloud services.
- Participated in requirement discussions, product demos, and cross-team coordination to ensure smooth delivery.
- Gained strong experience in understanding customer use cases and translating them into reliable system workflows.
- Quickly adapts to new tools, processes, and technologies with a continuous learning mindset.

Full Stack Application Developer
IBM

12/2021 - Present *Hyderabad*

Role and Responsibilities

- Collaborating on the execution of Design, Development, Validation, and Cloud-related Support activities in accordance with client requirements
- Participated in Knowledge Management activities and Hackathons
- Showcased proficiency in seamlessly transitioning applications from legacy to modern technologies
- Navigated challenges with adaptability, resilience, and proactive problem-solving capabilities
- Demonstrated extensive experience as an autonomous worker with a proven ability to collaborate effectively within a team.

Systems Engineer
Infosys

11/2019 - 12/2021

Role and Responsibilities

- Working on the implementation of Design, Development ,validation and Support activities in line with client requirements
- Excellent experience in client interaction, requirements gathering, development
- Has been a good Team player also have ability to work independently
- Easily adopts any technology with zeal to learn and handles pressure easily

EDUCATION

B.TECH in Electronics and communication engineering
K L University

06/2015 - 06/2019
Graduated with 8.8 CGPA

Board of Intermediate Education
Sri Chaitanya Jr Mahila Kalashala

06/2013 - 06/2015
95.5 % in State Board

SKILLS

core java | Generative Ai | Tines automation | Python | SpringBoot | Pegasys | Oracle db | microservices | SQL | MongoDb | Angular 17 | Apache Camel | Maven | RabbitMQ | Mean Stack Web Development | css | Kafka | Jenkins | html5 | Git | Junit | Agile | IBM Cloud | structs | Spring | Birt Reports | Good Communication skill | Mentoring skills | Fast Learner | DB2

PROJECTS DETAILS

Vantage-AI: Agentic Security Validation & Synthesis Engine (03/2026 - Present)

- Architected and led the development of a mission-critical Agentic AI framework to automate the end-to-end lifecycle of vulnerability management, from initial detection to enterprise-grade remediation.
- Skill Induction & Cognitive Reasoning: Engineered domain-specific Skill Formation within Codex to enable autonomous "Reasoning-to-Action" workflows. Developed the logic for AI agents to interpret complex security reports and perform deep-context analysis of codebase architecture.
- Autonomous In-Situ Validation: Designed a sandboxed VM Execution Environment (Cline) to perform In-Situ scanning , allowing AI agents to validate findings directly on the server without local code checkouts. This ensured a high security posture while accelerating analysis velocity.
- Reachability & Exploitability Analysis: Implemented AI-driven "tracing" logic to confirm the actual exploitability of findings, effectively eliminating false positives ("noise") and ensuring only high-fidelity vulnerabilities reach the triage phase.
- Logic-Driven Synthesis & Deduplication: Developed a sophisticated synthesis layer to consolidate findings across disparate scanning tools, ensuring a Single Source of Truth and preventing redundant entries in enterprise databases.
- Full-Lifecycle SOAR Integration: Orchestrated a high-velocity Tines pipeline to automate the population of BugDB/Jira tickets. The system auto-generates tickets enriched with product-specific metadata, severity ratings, and AI-generated remediation patches .

AI-Driven Security Orchestration & Log Intelligence (01/2026 - 02/2026)

- Architected a closed-loop security framework integrating Tines and OpenSearch to transform reactive log monitoring into an autonomous threat-response system.
- Engineered real-time Log Analytics using Point-in-Time (PiT) evaluation to identify malicious WAF patterns and trigger automated firewall rule deployments via the WAF Controller.
- Developed an Intelligent Triage Engine that autonomously categorizes security events, reducing manual SRE intervention for high-frequency breach attempts and ensuring immediate mitigation
- Automated Geographic Threat Intelligence , building a multi-timezone reporting system that identifies global breach trends and provides executive-level summaries for security posture reviews.
- Optimized Security MTTR (Mean Time to Resolution) by eliminating manual log-to-action handoffs through end-to-end orchestration.

Next-Gen Waf Controller (06/2024 - 12/2025)

- Played a key role in building a controller platform from scratch, helping SRE teams reduce tasks that previously took hours into just minutes.
- Improved operational efficiency by simplifying bulk updates through enhanced policy upgrade flows.
- Strengthened security processes by enabling faster handling of policy and NAL-related risks compared to earlier workflows.
- Supported smoother onboarding of bespoke and external policies, reducing manual effort and improving accuracy for SRE and DevOps teams.
- Contributed to end-to-end product improvements—design, development, testing, and user experience—ensuring the platform consistently met real operational needs.
- Skills Used: Spring Boot , Java , Oracle Cloud , Oracle Object Storage , Pegasys , Oracle DB , Custom Dope UI Framework , T2 Metrics, Oracle cloud

ACHIEVEMENTS/AWARDS

ROCKSTAR GOLD AWARD - Team 2025 (12/2025 - Present)

RockStar Gold Award (2025) – Oracle *: Awarded for excellence in technical innovation and team leadership within the SaaS Security Engineering divisions, specifically for advancing automated security orchestration frameworks we built*

INSTA AWARD - Top performers of quarter H'1 FY21 (03/2021 - Present)

Been Awarded by Infosys in recognization for my HardWork, Commitment, and OwnerShip in delivering good quality features

Excellence Awards -RISE Award for the category Rookie of the Quarter H'2 FY21 (06/2021 - Present)

Been awarded by Infosys an excellence award in Rookie of Quarter Category

INSTA AWARD - Top performers of quarter H'2 FY21 (07/2021 - Present)

Been awarded by Infosys for my contributions towards the company ,also for taking up challenges and been shown as fast-learner

CERTIFICATES

IBM Certified Technical Advocate - Cloud V4 (11/2023 - Present)

LANGUAGES

JAVA
Full Professional Proficiency

Python
Professional Working Proficiency

INTERESTS

YOGA | Gardening | Listening to music | developing/ mastering new skills

PROJECTS DETAILS

Process Integrity Metrics (12/2021 - 06/2024)

- Transformed a legacy desktop application into a dynamic web platform which uses Angular 17 in frontend
- Integrated new features into the migrated application, including robust authorization, authentication, seamless email communication, and a user-friendly "View Reports" function for quick access
- Reduced the metrics processing time from hours to minutes for enhanced efficiency.
- Skills Used: Java SE8, Spring boot, DB2, Angular, CI/CD through Git, IBM Cloud Object Storage, Birt Reporting

Seat Management Tool (SMT) (11/2022 - Present)

- Migrated SMT structs-based application to a web-based Angular platform for improved functionality and user experience.
- Incorporated numerous enhancements, including a dynamic floor map loader, lease and parameter management, and other pivotal features.
- Unveiled Srimati as the new Watson Assistant, designed to facilitate seamless navigation and address user queries effortlessly.
- Introduced a user-centric upgrade: the interface now customizes itself based on your role, ensuring a more tailored and efficient user experience
- Engaged in collaborative idea-sharing sessions to elevate and improve the application.
- Skills Used: Java SE8, Spring boot, DB2(sql), Angular, CI/CD through Git, IBM Cloud Object Storage

Young Living Essential oils (06/2020 - 12/2021)

- Built High impact features like placing an order, Replacing an order with multiple payment options
- Added new features to ecommerce site like to display future subscription Months to users, also to change their account name before 30days of account creation
- Revamped the existing order dashboard to provide user with multiple options to make a order
- Took ownership in Delivering many key features and complex stories with good quality and performance
- Participated in YL - Knocathon's and Launches
- Skills Used: Java SE8, Spring boot, Mongo Db, Apache Camel, Kafka, Rabbit mq, Microservices, sql db, Instana and Kibana monitoring tools
